Torn Insec	et Art	
Many insects in nature are very colorful and har allow you to creatively explore insect shape and insect creatures. You will tear colored paper into are to be arranged and glued to a background she	color by creating of shapes appropria	original and whimsical
Plan: What are the "typical" insect parts?		
What are some of the shapes of insects you have seen?		
What are some of the colors you've seen on insects?		
Do: Begin with black background paper. Create your insect to of your insect from colored construction paper. It is best you want them before gluing them. Finish the project by antennae, mouth parts, and wings if visible. Be sure your of your project before handing it in.	t to arrange all the process clearly labeling: hear	ieces on the paper the way ad, abdomen, thorax, eyes
Assessment Checklist:  All shapes are torn.  The image fills the space on the background paper.  Image uses color in an interesting way.  All parts were neatly glued down.  Insect has all common body parts.  Body parts are correctly labeled.  Student focused on getting the project done and to
